

Fan Control System

Part No: FC -006

Smart Switch Engine Room Fan Control System

FEATURES:

- Smart dash mount panel
- Three separate Fan outputs (one output reversable)
- Lazzarette On / Off Switch
- Auto / Manual
- Fans On / Off LED indication
- Emergency Stop & Fire inputs with LED indication
- Oil pressure switch input
- Communicates via two wire network cable

THE FC-006 Fan Controller provides an intelligent networked solution for monitoring & controlling the Engine room and Lazzarette fans.

The system consists of the FC-006 display controller (as seen above) and one Fan controller box, which communicate via a 2-wire network cable with a maximum cable length of 1000 meters.

Fan start, stop and run on times are all-programmable. The unit has some standard preprogrammed routines which may be used or create your own.

ORDER INFORMATION: Part No. FC-006
