

Monitors 2 Zones.

The FD-Z2 Fire Monitor provides an intelligent solution for the monitoring of up to 2 zones. The system consists of the FD-Z2 controller (as seen above), and any number of smoke or heat or a combination of both may be connected (max number = 10 per zone) Highly recommend to use only with marine approved heat and smoke detectors.

Comes with Zone text as follows:

ENGINE ROOM	ACCOM/CABIN
-------------	-------------

Or with an optional Zone text see below on request only

PORT ENGINE	STBD ENGINE
-------------	-------------

Minimum smoke current (alarm current) = 10mA

Operate voltage = 9 - 30vdc

Quiescent Current = 34mA @12vdc

Maximum current per zone = 320mA (including EOL)

EOL Res @12V 2K2 Ω

EOL Res @ 24V 5K6 Ω

All wire = UL Rated

Size = 65mm x 65mm x 80mm Deep
