

SOLID STATE PRESSURE SENSOR

Smart Switch Solid State Pressure Sensor

The unique Smart Switch pressure sensor is a solid-state pressure sensor offering numerous advantages over conventional probes or float switches. The pressure sensor constantly measures the fluid pressure within the tank ensuring highly accurate and reliable monitoring at all times. With no moving parts this solid-state technology provides efficient, innovative designs for a new generation of Smart Switch Technologies products such as the TD-4000, TM-4000 or TC-8000.

FEATURES:

The SEN-S/S sensor range is suitable for Water, Waste or Fuel.

The Top mount spear is a pressure sensor mounted at the top of a sealed Stainless tube.

The mounting is industry standard SAE-5 mounting pattern.

- Solid state (no moving parts to jam or clog).
- Compact size.
- High accuracy.
- Suitable for all types of tank materials.
- Suitable for black, grey, fresh water, diesel and petrol.
- Safe to use.

RANGE OF TANK ADAPTORS AVAILABLE - MODELS:

SEN-S/S50 Sensor: Pressure, Stainless Steel, 1/4" NPT, Max .5 meter

SEN-S/S100 Sensor: Pressure, Stainless Steel, 1/4" NPT, Max 1 meter

SEN-S/S250 Sensor: Pressure, Stainless Steel, 1/4" NPT, Max 2.5 meter

ORDERING INFO:

SEN-B300-600MM Top Mount 600mm long

SEN-B300-1200MM Top Mount 1200mm long
